

Summer Health Check Service

Syncretize

Delivering technology
for dental solutions

Service Highlights

Without preventive maintenance, computer systems can let you down. Often failing when you need them most, IT malfunctions result in downtime for your practice and headaches for you and your valued staff.

Our Summer Health Check Service delivers you preventative maintenance, by an experienced engineer at a fraction of the normal service price.

We know checkups are crucial for oral health, but do we realize how important they can be for the health of PCs?

Prevention is better than a cure, and comes at a much healthier price!

Preventive
Maintenance
